

04 City of Redmond, Downtown Circulation Options NE 76th Street Mainline

Changes from existing
NE 76th increased to four lanes with improved connections east and west to Redmond Way. Redmond Way and Cleveland Streets reduced to two lanes and changed to two-way streets.

10

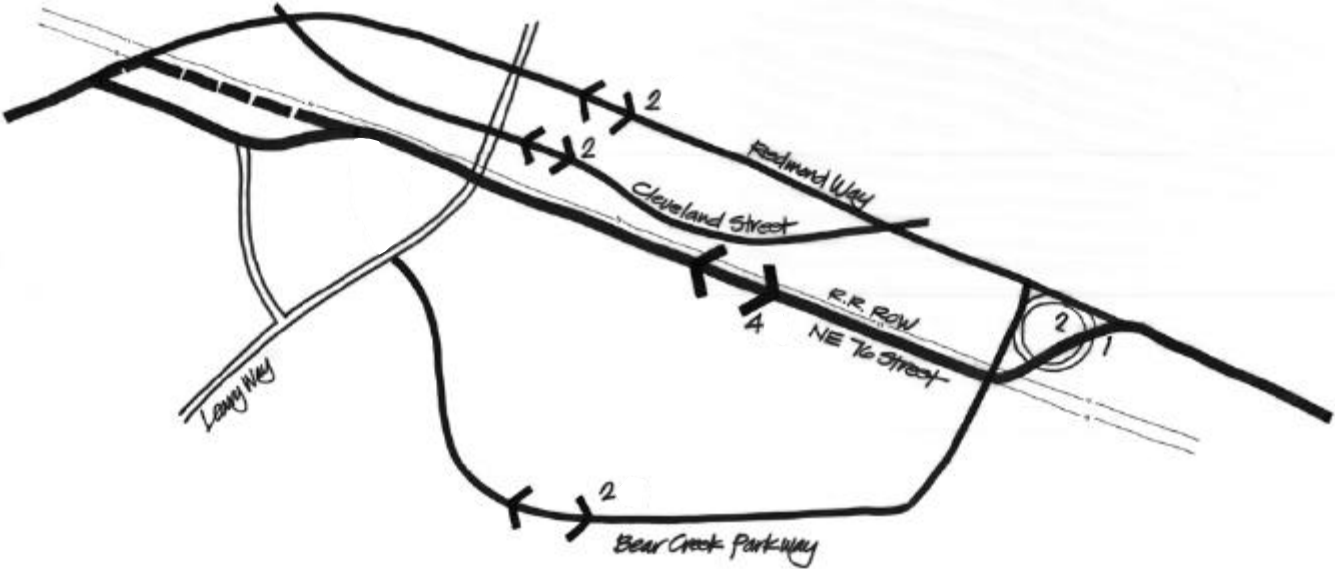

Opportunities

- Potential for "Main Street" Environment on Redmond Way and Cleveland Street
- Flexibility provided by all two-way configuration.
- Clarity of single through route
- Direct connections from east and west to Town Center
- Potential for eastern "Gateway roundabout."

Challenges

- Barrier between Old Town and Town Center
- Uses most BNSF right of way of all options
- Local circulation on 159 Place NE

Description: All two-way traffic with focus of through traffic on NE 76th Street. Redmond Way and Cleveland Street become local access emphasis.
